## Police Anti-Riot Barrier

### Anti-Riot Police Barricade System

Is designed to control riots in streets and urbanized areas and to protect the law-enforcement units in action whenever peace maintenance is required. The system is intended predominantly for the special military and police units responsible for the CROWD CONTROL during the violent political/social demonstrations, against football hooligans, etc.

### Anti-Riot Shield Suitable For

Communication with rioters through the loudspeakers.

To direct or disperse gathered crowds into desired areas or directions.

To execute direct observation and monitoring of the operational situation.

With use of the shield, it can be flexibly used for removal of smaller obstacles.

With use of an easy attachable bulldozer blade, it can be flexibly used for removal of bigger obstacles.

To block entirely narrow streets , create safe and effective access control to protected areas, buildings.

Anti-terrorist operations, fighting against snipers, allowing a safe access to buildings and other positions.

### Water Tank Specifications

Water Tank Capacity:	3000 ltrs
Foam Tank Capacity:	100 ltrs
Water Performance:	2 050 l/min at 0.6 MPa
	1 800 l/min at 0.8 MPa
	1 500 l/min at 1.0 MPa

## **Armored Anti-Riot Water Cannon Vehicle 6×4**

Water Cannon Riot Control

Anti-riot water cannon vehicle is a new generation of anti-riot special vehicle of our company. It has perfect functions of anti-riot and self-protection which make it to be the first choice for dispersing rioters without causing permanent bodily harm.
