*Depleted Uranium Thousands Of Us Troops Evacuated From Iraq For Unexplained Medical Reasons  
Known Illnesses Inflicted By Internalisation Of Depleted Uranium Particles*

---

On July 31, the Army Surgeon General announced an investigation into the deaths of two soldiers, Michael Tosta and Josh Neusche, and the hospitalisation of another 100, diagnosed with severe pneumonia. It has been established that inhaling large concentrations of DU-contaminated particles damages the lungs and kidneys and can cause respiratory illness

**General Illnesses:**

Abnormal metabolism of semen: contains amine & ammonium alkaline  
 Acute autoimmune symptoms (lung-, liver-, kidney failure)  
 Acute myeloid leukaemia (deadly within days or weeks)  
 Acute immunity depression  
 Acute respiratory failure  
 Balkan-syndrome  
 Blood in stool & urine (occult and visible)  
 Bone cancer  
 Brain tumours  
 Burning semen  
 Burning sensations  
 Chronic fatigue  
 Chronic kidney and liver disorders  
 Chronic myeloid leukaemia  
 Chronic respiratory infections  
 Colon cancer  
 Diarrhoea  
 Digestive problems  
 General fatigue  
 Glandular carcinoma  
 Gulfwar-syndrome  
 Headaches  
 Heart attack  
 High blood pressure  
 High frequency of micturition  
 Hodgkin lymphoma  
 Loss of memory

**General Illnesses:**

Immunity loss & general infections  
 Insomnia  
 Involuntary movements  
 Joint & leg pain  
 Joint pain  
 Kidney failures  
 Leukaemia  
 Liver carcinoma  
 Low blood oxygen saturation (low hbo2)  
 Low lung volume  
 Lung cancer  
 Lymph cancer  
 Lymphoma  
 Melanoma  
 Multiple myeloma  
 Myeloma  
 Muscle pain  
 Non-Hodgkin lymphoma  
 Other malignancies  
 Pancreas carcinoma  
 Petit & grand mal fits  
 Respiratory ailments  
 Shortness of breath  
 Skin cancer  
 Skin damage: sweat glands with trapped du-particles  
 Skin infections

**Illnesses Relating To Females**

Abdominal pain  
 Breast cancer  
 Breast cancer at very young age (20)  
 Cervix cancer  
 Headaches  
 Incontinence  
 Joint pain  
 Lung cancer at age 20 and no-smoker  
 Lymphoma  
 Menstrual pain  
 Miscarriages  
 Nausea  
 Ovarian cancer  
 Paralysis of digestive system  
 Skin cancer  
 Skin eruptions  
 Stomach pain  
 Suicide  
 Thyroid problems  
 Unable to walk  
 Uterus cancer

**Illnesses Relating To Males**

{Acute} headache  
 Acute myeloid leukaemia  
 Arthritis  
 Avoiding people  
 Breathing problems {stridor}  
 Chemical sensitivity  
 Chronic myeloid leukaemia  
 Gastrointestinal disorder  
 Hip- and leg pain  
 Joint pain  
 Lung cancer at young age incl non smokers  
 Lymphoma  
 Skin cancer  
 Skin eruptions  
 Stomach pain  
 Suicide  
 Testicular cancer  
 Unable to walk

**Illnesses Relating To Children**

Alimentary disorders  
 Asthma  
 Bladder & sphincter paralysis  
 Blindness  
 Complete range of known and unknown congenital defects  
 Deafness  
 Dyspraxia  
 Headache  
 Kidney disease  
 Leukaemia  
 Lymphoma  
 Malformations of legs, arms, toes & fingers  
 Respiratory disorders  
 Stillbirth  
 Neural tube defects
