

Heavy Duty Carbon Remover Suitable For All Military Small Arms

Next Generation Military Weapons Lubrication & Protection

BCS Heavy Duty Carbon Remover features a highly advanced chemical formulation that begins its assault on carbon fouling by utilizing a strategic blend of chemical surfactants that quickly loosens and releases carbon deposits from the surface of all small arms weapons.

BCS Heavy Duty Carbon Remover proprietary formulation utilizes a sophisticated blend of surfactants, penetrants, suspending agents, and chemical action to remove stubborn carbon deposits. This enhanced formulation provides a deep clean and also effectively neutralizes and removes the corrosive residues found in surplus ammunition and black powder.

BCS Heavy Duty Carbon Remover is the ideal cleaner for barrels, throats and chambers, AR bolt and bolt carriers, flash suppressors, compensators, revolver cylinders, gas pistons, and any other place extreme carbon fouling is found.

Features BCS Heavy Duty Carbon Remover

- Odor Free
- Safe To Use
- Fast-Acting
- User Friendly
- Non-Hazardous
- Powerful Action
- Does Not Contain Ammonia

Benefits

CLEANS AND REMOVES ALL DEPOSIT BUILD-UP

PREVENTS CORROSION AND DEPOSIT BUILD-UP

INCREASES VELOCITY AND PREVENTS JAMMING
